

IP Emergency Access & Utilization

Raw HSCRC Data Sample

Prepared by The St. Paul Group

Reporting Period: 7/1/2025 – 9/30/2025

IP Ambulance Arrivals Dataset Overview

This dataset supports review of inpatient volume originating from ambulance arrivals using summary-level HSCRC encounter data. It is presented at a non-confidential, compliance-ready level and is intended for healthcare finance, operations, and planning.

Sample Data Excerpt (for illustrative purposes only)

Provider Number	Ambulance Arrival	Discharges	LOS	Avg LOS	Total Charges	Avg Charges	Avg Income

Use cases shown reflect common internal applications by healthcare organizations and do not represent analysis or recommendations by The St. Paul Group.

What the Full Dataset Includes

- Inpatient discharges segmented by ambulance arrival indicator
- Associated length-of-stay metrics
- Charge and income measures
- Hospital-level summaries with totals for ambulance vs non-ambulance arrivals
- Standardized HSCRC hospital identifiers

How This Data Is Commonly Used

- Reviewing emergency access patterns and inpatient intake sources
- Supporting throughput and capacity planning discussions
- Informing financial and operational reviews related to emergency services
- Providing structured inputs for internal utilization analysis

IP Emergency Access & Utilization

Raw HSCRC Data Sample

Prepared by The St. Paul Group

Reporting Period: 10/1/2024 - 9/30/2025

IP ER Cases Dataset Overview

This dataset supports analysis of inpatient emergency department cases using summary-level HSCRC utilization data. It is summarized at a compliance-ready level for healthcare finance and planning review.

210016-White Oak Medical Center	8480	53799	6.34	207012213.71	24411.82	112797.69

Use cases shown reflect common internal applications by healthcare organizations and do not represent analysis or recommendations by The St. Paul Group.

What the Full Dataset Includes

- Inpatient discharges originating from emergency departments
- Length-of-stay and volume measures
- Total, average, and summary-level charge fields
- Provider-level and MSA-level views
- Consistent HSCRC reporting fields

How This Data Is Commonly Used

- Reviewing emergency-based inpatient utilization
- Supporting case-mix and capacity discussions
- Informing financial trend analysis related to inpatient admissions
- Serving as a standardized data input for internal modeling

Access & Delivery Options

The full dataset is available for purchase through The St. Paul Group and may be delivered via secure file transfer or accessed through an optional iSS subscription. iSS provides access to multiple years of historical HSCRC data and allows all datasets to be fully exported (Excel or CSV). Use of iSS is optional and is not required to purchase the data.
