

Chronic Care – Trend Data by Quarter Data Sample

Prepared by The St. Paul Group
Reporting Period: CY 2024 Q4 - CY 2025 Q3

Dataset Overview

This dataset supports analysis of chronic care utilization trends over time using summary-level HSCRC data. It is summarized at a non-confidential, compliance-ready level and is intended for industry review and planning purposes.

Sample Data Excerpt (for illustrative purposes only)

Discharge Date (By Year/Quarter)	Provider Number	Discharges	LOS	Avg LOS	Total Charges	Avg Charges	Avg Income
2024 Quarter/4	210038-Midtown	12	914	76.17	2528250.29	210687.52	102910.75

What the Full Dataset Includes

- Quarterly chronic care case counts
- Discharge volume and length-of-stay metrics
- Charge and income measures
- Summary-level provider views with quarterly and period totals

How This Data Is Commonly Used

- Reviewing changes in chronic care utilization across quarters
- Supporting population health and service line planning discussions
- Informing financial and operational trend analysis

Access & Delivery Options

The full dataset is available for purchase through The St. Paul Group and may be delivered via secure file transfer or accessed through an optional iSS subscription. iSS provides access to multiple years of historical HSCRC data and allows all datasets to be fully exported (Excel or CSV). Use of iSS is optional and is not required to purchase the data.
